

Mobile Application for Android and iOS platforms

Industry:
Healthcare

Client:
Healthcare
Company

Location: U.S.A

CHALLENGE

Our client needed a secure platform which would allow users to store, access and share their medical data on one platform.

SOLUTION

We architected, designed and developed a hybrid mobile application using Apache Cordova platform. The application allows users to easily manage their medical records such as prescriptions, reports, test results, and medical files related to allergies and medical conditions on one platform in online and offline modes. The users can share their reports with their doctors and family members, and store and manage the medical data for their families. All data is hosted on secure cloud servers with 256-bit transfer encryption.

TECHNOLOGY STACK

Apache Cordova
HTML5
CSS3
PhoneGap Native Plugins

BENEFITS

- Ability to monitor medical records at any time and on any device.
- Reduced paper consumption.
- Secure cloud storage.
- Easily managed family records.
- Safe, accurate, fast and easy record keeping and sharing.
